None of the references show the preparation of an orange juice by the specific process steps of the claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, 23 & 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powers (4,889,739).

Powers discloses the production of an orange juice with minimized levels of peel oil by gentle extraction of the juice from the orange. The claims appear to differ from Powers in the method by which the product is made. The fact that the product may have been made by a different process does not alone constitute unobviousness.
